

Junior Wind Operations Manager

ContourGlobal is an established Independent Power Producer developing, acquiring, and operating electricity generation assets worldwide. The company currently manages more than 6.2 GW of installed capacity across different generation technologies in 18 countries across Europe, Africa, Asia, North and South America. With a current share of renewables capacity of 27%, the company has committed to speed up the decarbonization of its portfolio with a sustainable transition of its thermal fleet, the repowering of existing renewable assets and the organic development of new renewable projects. ContourGlobal, a KKR company since 2022, has a track record of almost 20 years of experience in partnering with communities, institutions, and customers that benefit from its power supply through long-term contracts or innovative PPAs, coupled with energy management solutions.

As a **Junior Wind Operations Manager**, you will support our "Wind Operations" team in day-to-day operations and general administrative tasks. Knowledge in the field of wind energy is advantageous.

- Support for day-to-day operations and coordination with internal and external partners (e.g. alignment with service partners, grid operators, property owners, and municipalities)
- Ongoing monitoring of relevant key figures such as self-consumption, plant availability, and production.
- Reporting and preparation of weekly and monthly data, outage and performance analysis, charting (using SCADA, Excel, PowerPoint, Box and other internal systems)
- On-call duty as well as coordination of maintenance teams
- Preparation of tender invitations, processing invoices and review of grid system fee, as well as close coordination with the finance department
- Occasional technical support of construction sites, greenfield project development (wind and PV) including support with energy yield assessment, operational and construction costs and grid availability.

Commit to Lead with Our Values:

- Commit to CG values as expressed in the Essential Information. Model the values in any interaction internally and externally.
- Put Health and Safety First
- Embrace Timely Transparency
- Model the 3Cs – Communication, Collaboration and Coordination
- Embrace Failure analysis and continuous improvement including Five Whys
- Seek out ways to incorporate technology and Artificial Intelligence into the company's legal practice

Qualifications and Skills:

- Completed education with a focus on renewable energy OR relevant experience. Technical background is an advantage.
- MS-Office skills (Excel, Word, PowerPoint)
- Good written and verbal German and English language skills
- Independent, accurate, and structured way of working
- Team Player with strong work ethic

Our Offer:

- Full-time
- Working in a dynamic & international company
- Modern office in the heart of Vienna
- Pleasant working atmosphere
- Competitive salary and bonus opportunity
- Home Office
- Numerous employee benefits such as Wiener Linien ticket, Meal vouchers, etc.

Travel Requirements – This position will require occasional business trips.
